

STONE STRONG SYSTEMS

EFFICIENT

The system's unique hollow design means less weight per square foot, reduced transportation cost and a much faster, easier, and less costly installation.

SIMPLE

Lift loops ensure blocks interlock and align units for consecutive level courses. Stone infill secures blocks together without mechanical assistance. Install 1,500 square feet of block a day with just a three man crew.

INNOVATIVE

Innovative hollow design makes Stone Strong the only wall system in the industry to feature a fully integrated drainage system requiring no additional parts or labor.

ROBUST

The 24-square-foot block reduces labor costs and installation time, while its sheer size and weight provides structural strength without any need for tie-backs or additional mechanics.

MSE

“THE MOST **COMPLETE** RETAINING SYSTEM ON THE MARKET TODAY”
 - GORDON STEVENS, P.E.

In a constantly evolving retaining wall industry, challenges arise not only in finding innovative solutions, but also in finding ways around rising production costs and labor shortages. Finding a reliable solution to these obstacles can be a challenge for producers, designers, and installers. Fully engineered both structurally and geotechnically, Stone Strong delivers intelligent retaining wall solutions that are not only proven, but also reduce installation time, labor, and production costs.
